

量词“双”

量词“双”可以用于成对的东西，一般是两个一样的。

比如说：一双手、一双鞋子、一双袜子、一双手套、一双筷子
但是汉语的“一双”跟英语的“a pair of”不完全一样，比如说英语可以说“a pair of trousers”，但是汉语不可以说“一双裤子”，应该说“一条裤子”。

The measure word "shuang" can be used to describe something in pairs, usually two are the same.

For example, 一双手(both hands)、一双鞋子(a pair of shoes)、一双袜子(a pair of socks)、一双手套(a pair of gloves)、一双筷子(a pair of chopsticks)

But "shuang" in Chinese is not exactly the same as "a pair of" in English. For example, you can say "a pair of trousers" in English, but you cannot say "一双裤子" in Chinese, you should say "一条裤子".
